

IDENTIFY. TRACK. MANAGE.

The Easy to Use, Mobile Tracking and Counting System

Built for the mobile workforce Accuviti ITM supports Barcoding, and Optional RFID with a built-in counting and verification feature. Accuviti ITM integrates seamlessly with a variety of data sources, including ERP and MRM systems. With over 25 preloaded label templates, Accuviti ITM supports a full range of labeling needs, giving you the ability to Identity, Track & Manage your assets.

IDENTIFY.

Accuviti ITM offers flexible label printing with support for multiple barcode types, including GS1 and Data Matrix. With over 25 label templates in various sizes, Accuviti ITM allows you to mix and match data fields as needed supporting RFID printer tagging using EPC data and enables mobile printing via Bluetooth and network printers.

TRACK.

Accuviti ITM features flexible count setup with built-in verification, auto-count per scan, and RFID-only tools for multi-tag counting and item locating—like a Geiger counter for RFID.

MANAGE.

Accuviti ITM supports flexible data formats like CSV and XML, with integration to cloud storage platforms such as Google Drive, Box, Dropbox, and custom networks. It manages file revisions and renaming, while offering adaptable data field mapping with support for multiple field types.
