

Accuviti™ ITM

By AB&R

IDENTIFY. TRACK.
MANAGE.

The Easy to Use, Mobile Tracking and Counting System

Accuviti™ ITM by AB&R® is a mobile-first AIDC platform built to identify, track, and manage assets with ease. It combines barcode and RFID scanning, data collection, and real-time visibility in one intuitive app. Whether on the production floor, in the warehouse, or in the field, Accuviti™ ITM delivers the accuracy, control, and insight needed to keep operations running efficiently online or offline.

IDENTIFY.

See exactly what you have and where it belongs.

Accuviti™ ITM connects people, assets, and data in real time through barcode and RFID capture. Identify items, tools, and materials across facilities or job sites to ensure accuracy from the start. Mobile workflows and automated validation eliminate guesswork and maintain data integrity at every scan.

TRACK.

Keep every asset visible and accounted for.

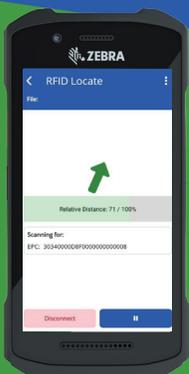

From warehouse to field operations, Accuviti™ ITM tracks asset movement and location. Real-time tracking and offline capture prevent loss, improve accountability, and streamline audits. Custom workflows adapt to your environment, helping teams move faster and make informed decisions with live data.

MANAGE.

Turn information into insight.

Accuviti™ ITM centralizes workflow data for a clear view of asset status, utilization, and performance. Review history, verify compliance, and export results to enterprise systems. Accuviti™ ITM connects field activity with operational visibility, turning data into decisions that drive productivity.

Stop Searching. Start Finding

Accuviti™ ITM's RFID Visual Locator provides real-time directional guidance and proximity feedback to pinpoint tagged assets quickly. Operators can locate items faster, reduce downtime, and recover misplaced assets with confidence.

Disclaimer: Accuviti™ ITM is compatible only with Android Devices equipped with an Integrated Barcode Scanner or RFID Reader
